

FROM RESEARCH TO INDUSTRY

CEA Tech relies on state-of-the-art technological platforms and two major campuses in the Paris and Grenoble areas to perform applied research in its three institutes:

LETI (micro-nanotechnologies for IT and health)

LITEN (new technologies for energy and nanomaterials)

LIST (complex systems and software intensive technologies)

CEA Tech is focused on **innovation** through **start-ups creation**, **Joint Research Units** and **Technology Transfer** to industrial partners.

CEA Tech is a leading Research & Technological Organization located on two major campuses in France: Paris-Saclay and Grenoble-GIANT. We leverage on state of the art technology platforms to develop innovative solutions to help industrial partners accelerate their new product developments. Our fields of excellence include nano-materials, micro-nanotechnologies and related processes, new technologies for energy such as PV cells, Batteries, Biomass and Power Conversion devices for energy efficiency, miniaturized devices for life science and healthcare applications, and Smart Systems & Solutions (hardware and embedded software integration) for Telecommunication, Transportation and Construction Engineering.
